
JAVA Fundamentals

Intro to JAVA: Challenge

Initials

You have learned the basic structure of a JAVA program. Your task is to create a new program called Initials that will use several `System.out.println()` commands to display your initials in large block letters, for example: DEL

```
DDDDDDDD      EEEEEEEEEEE      LLLL
DDDDDDDDDD    EEEEEEEEEEE      LLLL
DDD   DDD     EEEE           LLLL
DDD   DDD     EEEEEEEEE      LLLL
DDD   DDD     EEEEEEEEE      LLLL
DDD   DDD     EEEE           LLLL
DDDDDDDDDD    EEEEEEEEEEE      LLLLLLLLLLLL
DDDDDDDD      EEEEEEEEEEE      LLLLLLLLLLLL
```

Procedure

Start with your class header...

```
public class Initials{
```

Include your main method...

```
public static void main(String [] args){
```

Use the `System.out.println()` to display each row of initials.
