BUILD REAL WORLD THINGS

- Use HTML, CSS, Javascript to build modern websites
- Build Native Apps
- Use Python to run manipulate data and run AI/ML models
- Build real world components with Raspberry Pi
- Learn how they come together in modern inventions

CLIENT

TESTIMONIAL

The Code Hero Academy team have been awesome! They are approachable and have a very engaging curriculum for kids. Our kids have a blast going there a couple times a week. They have an awesome, practical, and agile curriculum where they gradually ramp up learning. A mix of theory, coding, and hands-on robotics encourages kids in such a way they can't wait to get back :). Looking forward to continuing the kids' journey of great learning and fun.

RAMKI :: PARENT

Code Hero Academy LLC

JUNIOR KIDS PROGRAM 6 TO 10 YEAR OLDS

Designed to promote logical thinking and problem solving
